product spotlight

Rack Solid! This rack will hold a "ton" of stuff!

Combining the stability of a cabinet with the airflow of an open rack

We've received a number of custom requests from customers saying, "I need a rack that will support "a ton" of equipment!" We seem to be building more and more lately and we've decided to include this type of application as one of GLCC's standard products.

Shipped unassembled with hardware included, this unit is constructed from heavy duty, powder-coated, 12-gauge cold-rolled steel and has a weight capacity of 2,000 pounds! This rack works well as a stand-alone or can be bayed, using the available bay kit (part no. 6102). Casters are also available! (750 pound capacity, Part No. 7208-4PHD)

If you have need for an economical solution to support your heavy equipment and to maximize your available airflow, this 42 rack unit configuration conforms to the EIA standard for 19" equipment and features universal M6 mounting holes. Also included are 50 M6 cage nuts and screws for mounting.

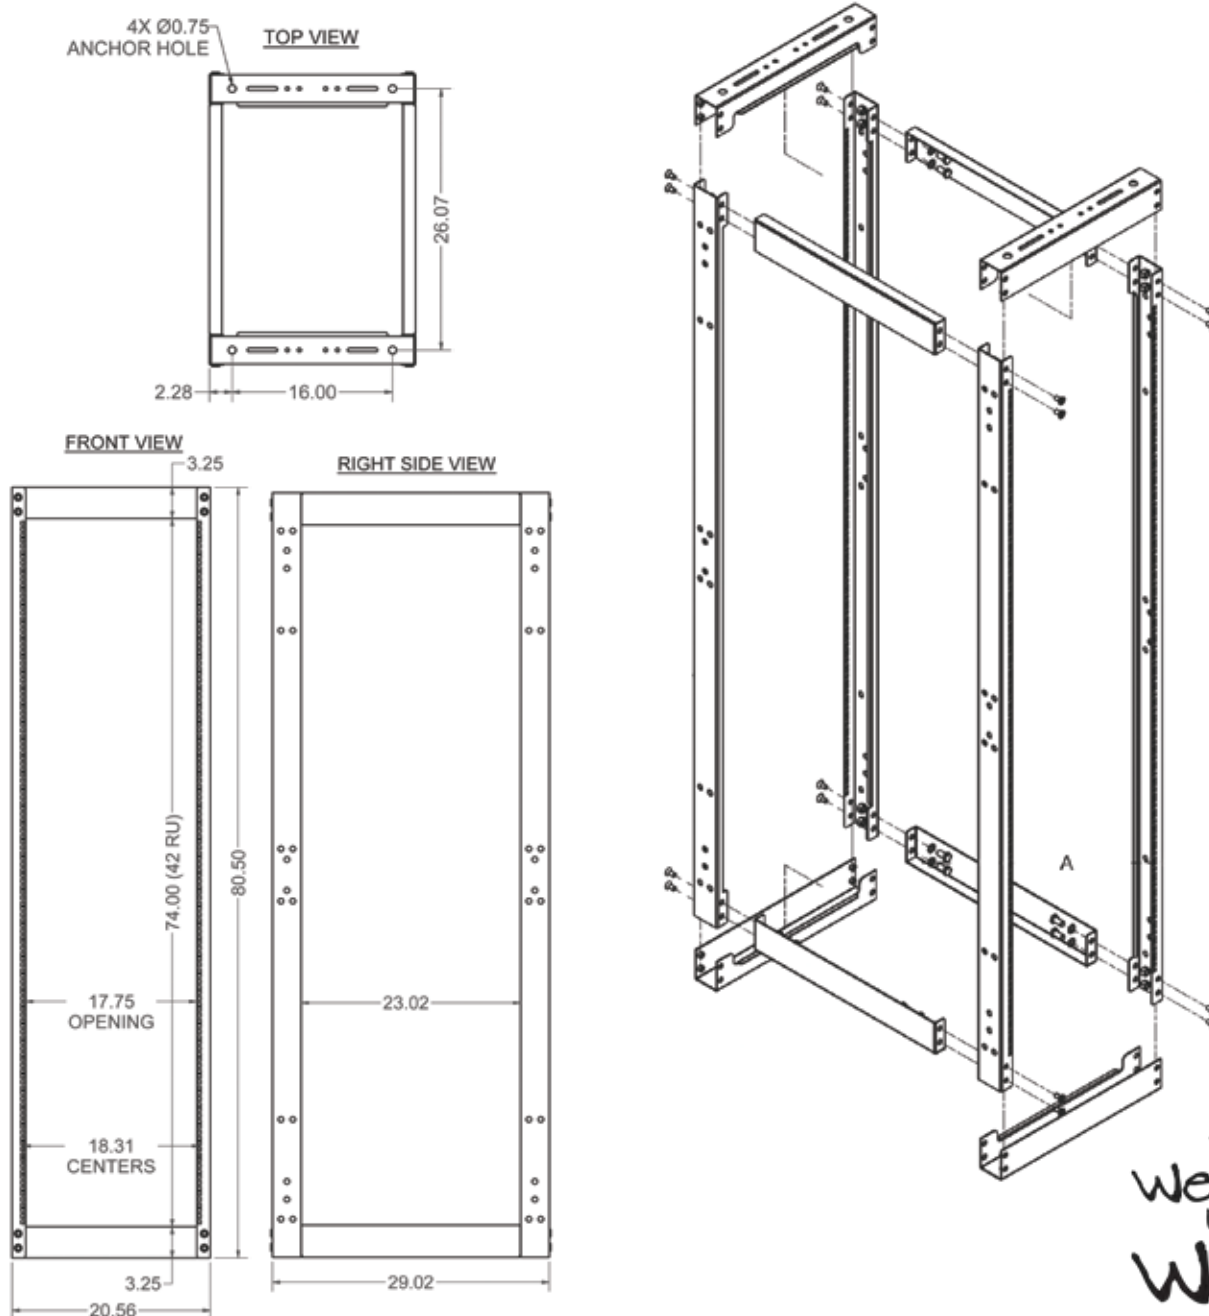

For more information, talk to your Great Lakes representative or call us at 1-866-TRY-GLCC.

Part No.	Description
4PHD29	Heavy Duty Four Post Rack, Cage nut mtg. 29" D
