

Rack Cabinet, Knock-Down Design (1000 lb) *REFK Series*

Knock-down rack cabinet designed for general-purpose equipment installations requiring durability, flexible rail mounting, and easy transport.

Key Features and Benefits

- 16-gauge steel cabinet construction with 10-gauge combination mounting rails (1000 lb **capacity**) provides durable support for AV, lab, and general equipment.
- Knock-down cabinet design (ships unassembled in flat pack) supports easier transport, reduced shipping cost, and installation in tight access areas.
- Two (2) pairs of infinitely adjustable EIA-310 compliant **combination** mounting rails (10-32 threaded) support flexible equipment mounting, including a mix of rack types. Includes mounting hardware.
- Self-squaring cabinet design with simple assembly (one bolt per corner) allows fast installation with minimal tools.
- C-channel strut construction provides cabinet strength and flexibility for rail positioning and equipment support.
- Removable gland plate with rear bottom cable entry supports organized cable routing and wiring access from below.
- Solid non-removable side panels with optional doors (solid, louvered, or window) support security and airflow configuration.
- Includes four (4) adjustable nylon leveling feet with optional caster mounting supports stable installation and mobility options.
- TAA-compliant, manufactured in North America supports government procurement requirements and ensures consistent quality.
- Textured powder coat finish (GREENGUARD, TSCA, RoHS compliant) supports indoor air quality and environmental compliance.

The REFK Series rack cabinet provides a durable, knock-down solution for general-purpose equipment installations. With a 1000 lb load capacity and flat-pack design, it supports easy transport, fast assembly, and deployment in environments with limited access.

Featuring combination mounting rails, flexible cable entry, and adjustable configurations, the REFK is ideal for AV, lab, telecom, and industrial applications requiring strength and installation flexibility.

When another product may be a better choice

- When you need a welded cabinet for maximum rigidity and no assembly, consider our **C2RR Series**.
- When you need a modular cabinet system with flexible configuration, consider our **RCK Series**.
- When you need a compact cabinet solution with stacking capability, consider our **RCSC Series**.

Accessories

- Rack Shelves
- 10-32 Mounting Hardware
- We Manufacture PDUs and Outlet Strips

- Adjustable Depth Cable Manager Front to Rear Rack Cable Support
- Horizontal Cable Manager and Wall Mount Cable Claw
- Rack Panels for Rack Optimization
- Ground Stud Kit
- Square Hole Punched Mounting Rail
- Rack Equipment Installation Tool
- Horizontal Cable Management Bar Steel Cable Support Bar
- Cable Management Arm Hinged for Sliding Rack Equipment
- Bonding and Grounding
- Mounting Rack Rails
- Rack and Cabinet Caster Set
- Rack Shelf Slide Block

Where the series works best

- AV and media installations.
- Test and measurement environments.
- Industrial and automation systems.
- Telecom and legacy network equipment setups.

Applications and when to use the series

- Applications needing combination mounting rails for mixed equipment types.
- Environments where access is limited and full cabinets cannot be moved in assembled.

- Installations with limited access or difficult transport conditions.
- Deployments requiring durable cabinet construction with flexible installation.
- Installations supporting AV, lab, telecom, or general equipment.
