

Wall-Mount Desk for IT Equipment (100 lb) *WMD Series*

Wall-mounted desk for supporting non-rack equipment in telecom and IT installations.

Key Features and Benefits

- 16-gauge steel construction (100 lb **capacity**) provides reliable support for non-rack equipment such as laptops, tools, and test devices.
- Wall-mount desk design provides a stable work surface for configuration, servicing, and temporary equipment placement.
- Designed to support non-rackmount equipment ideal for field laptops, diagnostic tools, and staging equipment.
- Can also be rack-mounted as a shelf/desk accessory supports flexible installation within rack environments.
- Rear and side cable pass-through cutouts support organized cable routing and clean installations.
- Flat-pack (knock-down) design reduces shipping cost and simplifies handling and storage.
- Available in black or light gray powder coat finish (GREENGUARD, TSCA, RoHS compliant) supports indoor air quality and installation flexibility.

The WMD Series wall mount desk provides a practical solution for supporting non-rack equipment in telecom and IT environments. Designed as a wall-mounted workspace, it allows technicians to configure, test, and service equipment directly at the installation site.

Constructed from 16-gauge steel with a 100 lb load capacity, the WMD supports laptops, tools, and temporary equipment while maintaining a compact footprint. With integrated cable pass-through cutouts and flat-pack design, it is ideal for structured cabling and service applications.

When another product may be a better choice

- When you need a wall rack with an integrated shelf, consider our **APBS Series**.

Where the WMD series works best

- Telecom rooms and network closets requiring a temporary workspace.
- Field service environments for laptop configuration and diagnostics.
- Wall-mounted installations without available rack shelf space.
- Retrofit installations where adding a cabinet is not practical.
- Environments requiring a simple, dedicated work surface.

Applications and when to use the WMD series

- Installations requiring a wall-mounted workspace for configuration and servicing.
- Applications needing support for non-rack equipment such as laptops and tools.
- Environments where temporary staging or testing equipment is required.
- Deployments requiring a simple alternative to rack shelves or carts.
- Installations where space is limited but a work surface is needed.
