

Keystone Jacks Accessories

KEY FEATURES

- Provide port protection, service identification and color-coding
- For use with both unscreened and screened MT-Series keystone jacks

A number of accessories are available for Signamax Keystone Jacks. Designation icons and dust covers can be specified, for providing both port protection and color-coding. The universal wiring fixture is compatible with Category 3, 5e, 6 and 6A connectors. It helps to facilitate wire orientation and termination on-site.

KEYSTONE JACKS DUST COVERS AND ICON TABS
