

VGC™ RG6 Quad Shield Hex Crimp Connector

Features & Benefits

- Easy installation to any quad-shield RG6 coaxial cable with any standard hex crimping tool
- High performance F-type connector capable of a bandwidth up to 3 GHz
- Bulk packaged in bags of 100

Construction

Material:

- (1) Nut: Nickel Plated Zinc
- (2) Liner: Nickel Plated Brass
- (3) Shell: Nickel Plated Brass

Connector Type: F-type Hex Crimp for Quad Shield RG6

Applications

The Vericom RG6 quad shield hex crimp connector is an economical solution for terminating RG6 coaxial cable. This connector is commonly used for antenna, cable television and satellite television installations.

Description / Specifications

This RG6 quad shield hex crimp connector is made from anodized brass to provide long life, free from oxidation. The nut on this connector is larger than that on most F-connectors available which means more threads for better shielding, and a larger surface to finger-tighten the connector.

Ordering Information

Description	
F-Type Hex Crimp Connector for Quad Shield Coaxial Cable	
Packaging	Item Number
Bulk (100 Per Bag)	WCR6Q-03443

To ensure a proper connection, pair Vericom's WCR6Q-03443 with our Coax Hex Crimping Tool Item SKU (WTCXC-03634).

Electrical /Mechanical

Impedance: 75Ω

Bandwidth: 0-3,000 MHz (3 GHz)

Environmental Conditions

Operating Temperature: -40 °F to 140 °F (-10 °C to 60 °C)
