

VGC™ Retro Fit Mounting Bracket

Single Gang Retro Fit Mounting Bracket

Dual Gang Retro Fit Mounting Bracket

Applications

These retro fit mounting brackets are designed for the professional installer to mount plates flush against the wall, while giving them the support needed for long lasting, durable installations. These brackets are a time and money-saving solution for “existing construction” installations that require a retro fit solution and are suitable for low-voltage- Class 2 wire only.

Description / Specifications

These UL Listed retro fit mounting brackets are available in black, in either single gang or dual gang and include innovative mounting wings to help secure the bracket to the wall. These simple to install brackets can be horizontal or vertically mounted and adjust to fit various wall thicknesses.
